

The environmental policy at Sjørring Maskinfabrik (SJM) applies to all corporate activities related to planning, production and shipment of products.

The overall policy is that SJM will always appear as an environmentally conscious company, where both its employees as its surroundings can feel safe.

SJM will through a determined effort and defined environmental objectives promote a successful and safe environment. Prevent and reduce adverse environmental impacts caused by the production and handling by SJM, use and disposal of hazardous substances.

The employees at SJM shall through information, education and other influences be aware of environmental policy and be motivated to demonstrate environmental awareness and responsibility.

SJM will as minimum comply with applicable laws and regulations to promote openness and dialogue between the company and the public.

Environmental policy and action plans will, like other business policies and action plans, regularly be reviewed in order to improve environmental performance.

Current focus is the reduction of noise out against neighbours, reduction of volatile compounds (VOC) in exhaust air from paint department, and a reduction, or alternatively the substitution of hazardous chemicals with less hazardous substance.

SJM`s environmental management system must be certified according to EN ISO 14 001
